

**INDEFF**

Countless parts.  
One flow.

# Increase your industrial efficiency

## **Backed by an age-old mission**

The first ever recorded writing was credited to Sumerian scribes more than 5,000 years ago. Their purpose? Better resource planning and improved production efficiency.

Today, INDEFF is powered by that same, fundamental drive – transforming countless processes and information into a more efficient production flow. Into pure industrial efficiency.

## **Proven expertise in industrial automation**

INDEFF boasts more than a decade of experience as an Endorsed Wonderware System Integrator Partner and has successfully completed more than 500 projects all over the world.

How we innovate? By preparing companies for Industry 4.0 and helping them create smart factories. As a proud AVEVA partner, we embrace the advantages of the Industrial Internet of Things and set up fully connected supply chains for maximum efficiency. ■

**“The drive  
for efficiency  
is in all of us.”**

ALLOW ME  
TO INTRODUCE  
MYSELF

**PETER  
BRESSELEERS**  
CEO

# The INDEFF Way

**Wouldn't you like to know if a serious production issue could arise hours, or even days, before it actually happened?**

Or avoid solving the same problem twice, on opposite sides of the globe? We would, too. That's why our experts do what they do best:

**AUTOMATE, INTEGRATE  
AND ELEVATE TO MAKE  
YOUR PRODUCTION  
PROCESS FLOW FLAWLESSLY.**

## Backed by experts

At INDEFF, we pride ourselves in a partner network that covers a wide range of expertise and adds value to every project.

### OEM partner

The art of industrial intelligence

### Gold partner

Removing the complexity from availability

### Endorsed system integrator

Market leader in SCADA, MES and APM

## INDUSTRIAL AUTOMATION

# In control of your processes

Running an efficient production facility cannot be done without extensive process control. That is why most companies are already **automating processes**. But what is the best plan of action? Tap into our expertise, start innovating as soon as possible and automate your production process. ■

**Decrease  
downtime,  
increase  
productivity,  
and enjoy  
extensive data**

### **Optimal production**

PLCs, SCADA or a combination of automation systems – these tools make thousands of factories run every day. Automatically.

### **Safety first**

Transfer hazardous tasks from human hands to automated processes. Extreme temperatures or toxic environments no longer form insurmountable obstacles.

### **Process knowledge**

Optimizing production processes is not just about the design of your models. It requires a fluid exchange and creation of knowledge.

# In-time production monitoring

MES allows you to **monitor industrial operations in real-time**. The resulting flow of information organically increases your level of control, provides the **oversight & flexibility** needed to optimize your production efficiency and develop a scientifically sound strategy for improvement. ■

Integrate your ERP  
and MES for superior  
production efficiency

## Here & now

Access product specifications, work schedules & instructions, material traceability and everything else in one place, all the time.

## Lean & mean

Embrace lean manufacturing and optimize inventory levels and production logistics.

## Read & adjust

Identify bottlenecks, establish best practices and standardize your processes thanks to Overall Equipment Effectiveness and downtime logs.

Turn raw data  
into business intelligence  
for improved asset performance

## ASSET PERFORMANCE MANAGEMENT

# Increase your equipment's uptime

Asset Performance Management helps you improve the reliability and availability of physical assets throughout your production process. Connected by the Industrial Internet of Things, APM gathers, transmits and interprets data to help you implement a **predictive maintenance strategy** that dramatically increases the uptime of all your assets. ■

### Connect smart assets

Low-cost sensors deliver standardized data sets from every process, everywhere. This information forms the groundwork for your digital transformation.

### Minimize operational risk

Condition monitoring and asset integrity management improve your reaction-speed and ensure less costly downtime.

### Maximize asset reliability

APM-powered predictive – and even prescriptive – maintenance lead you to operational excellence.

# Industries we work for

## FOOD & BEVERAGE

A taste of success

## INFRASTRUCTURE

Real-time monitoring & control

## OIL & GAS

Well-oiled supply chain

## MANUFACTURING

The assembly line of tomorrow

## LIFE SCIENCES

Healthy manufacturing practices

## CHEMICALS

When every atom counts

CURIOUS WHAT WE CAN DO FOR YOU?  
LEARN ABOUT THE POSSIBILITIES  
FOR YOUR INDUSTRY

# Global careers in automation

Are you looking to extend your range?  
Do you want to work for a global  
automation innovator? INDEFF is always  
looking to hire ambitious engineers ready to  
take on international automation projects.
